

Water Heating Boiler Polytechnik 5 MW

CREDITWEST
Creditwest Bank Ukraine

The name of the equipment

JSC "CREDITWEST BANK" (hereinafter - the Bank) offers for sale a **water heating boiler Polytechnik 5 MW (2010Y)** complete with a fuel device and an electronic control unit, located at the address: Chernihiv region, Vokzal-Horodnia village, and is owned by the Bank.

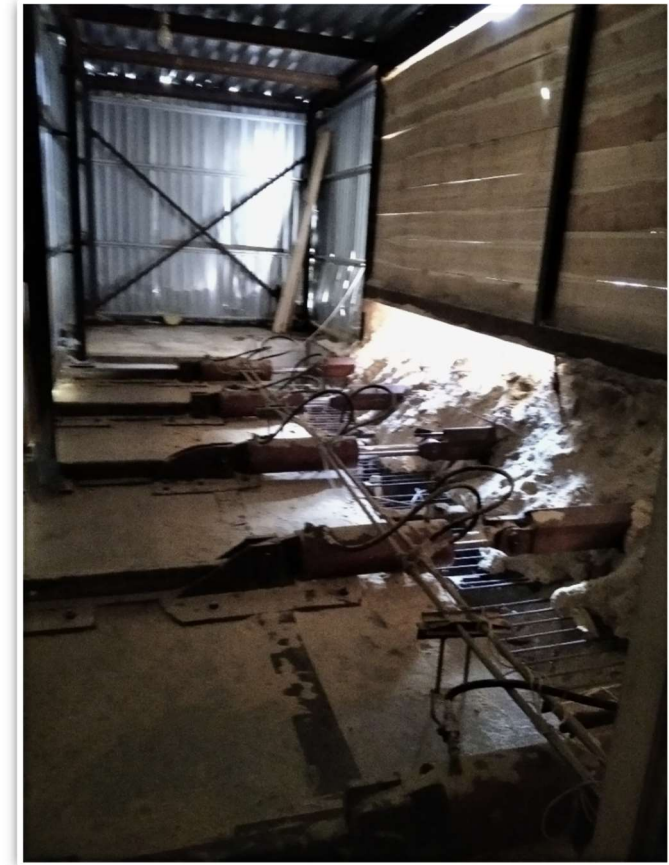

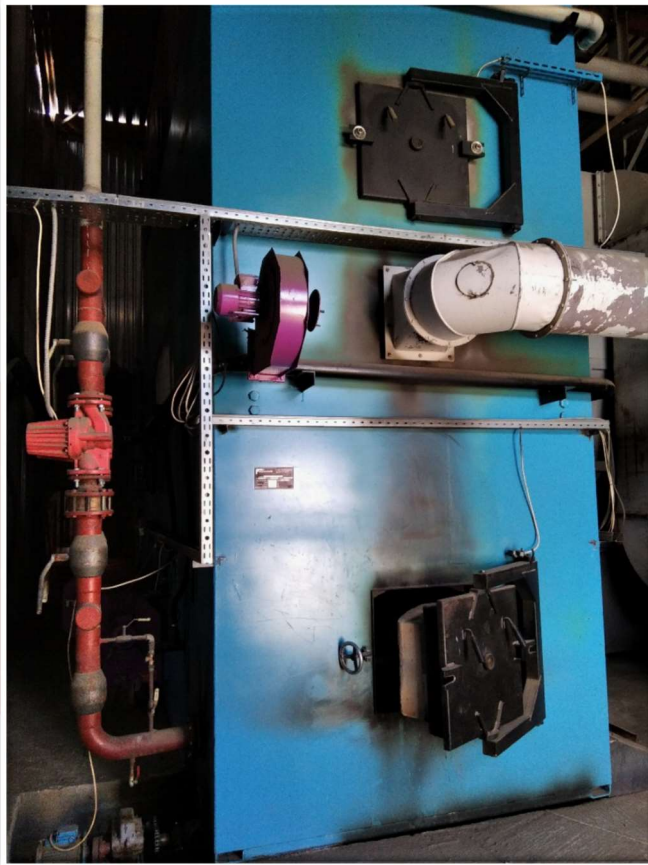

Water Heating Boiler Polytechnik 5 MW

The boiler Polytechnik model HVR 4000-19 is a highly efficient horizontal type, boiler made of steel in accordance with the requirements of steam boiler piping. The boiler is made entirely with the use of electric welding. The doors of the front chamber open in such a way that they do not at all interfere with the cleaning of the section where the combustion gas enters. The pressure body of the boiler is insulated to reduce heat transfer with high-quality mineral wool in accordance with standards. Outer sheathing is made of steel sheet with enamel coating. The boiler comes complete with a fuel device and an electronic control unit.

Water Heating Boiler Polytechnik 5 MW

Consumption of raw materials up to 10 m³/h. Year of manufacture – 2010. Country – Austria.
